

Component sourcing summary by country

The table below summarizes the River-class destroyer's major components by sourcing location. It lists key systems and indicates the primary country or region responsible for manufacturing or assembly, along with evidence for each entry.

Component/system	Primary sourcing location(s)	Evidence
Hull steel, aluminium & plates	Canada – Russel Metals supplies steel plates, profiles and aluminium sheets; materials are delivered to Irving Shipbuilding and fabricators across Canada ¹ .	Russel Metals announcement ¹ .
Lead ballast	Canada – Marswell Metal Industries in Burlington, Ontario manufactures lead ballast components using 100 % Canadian materials and labour ² .	Marswell release ² .
Propellers & fin stabilisers	Norway/Europe & Canada – Kongsberg Maritime manufactures propeller hubs and blades in Europe and performs final assembly and integration in Canada. Earlier contracts include non-retractable fin stabilisers, steering gear, rudders and RAS high-point equipment ³ ⁴ .	Naval Today ³ and Janes ⁴ .
Mission Bay Handling System	Canada – Rolls-Royce builds the MBHS at its Naval Handling Centre of Excellence in Peterborough, Ontario ⁵ .	Rolls-Royce press release ⁵ .
Helicopter handling (ASIST)	United States – Curtiss-Wright integrates the ASIST helicopter handling system; the US\$25 million contract covers three ships ⁶ .	Curtiss-Wright press release ⁶ .
Engine intake/exhaust & IR suppression	Canada – W.R. Davis Engineering (Ottawa) designs and implements the engine intake/exhaust system and infrared suppression devices ⁷ .	ShipsforCanada article ⁷ .
Flexible hose systems	Canada – Patlon Aircraft & Industries of Ontario supplies flexible hose systems and bellows ⁸ .	Patlon article ⁸ .
Gas turbine	UK/USA – Rolls-Royce MT30 gas turbines are produced at Rolls-Royce facilities in the UK and U.S., then delivered to Halifax ⁹ .	Rolls-Royce press release ⁹ .

Component/system	Primary sourcing location(s)	Evidence
Diesel generators	Canada – mtu Series 4000 diesel generators are licence-built by Wajax Power Systems in Canada ⁹ .	Rolls-Royce release ⁹ .
Electric propulsion motors	United Kingdom – GE Power Conversion's Rugby plant produces the ultra-quiet electric motors used in the Type 26 and the Canadian Surface Combatant ¹⁰ ¹¹ .	Navy Lookout analysis ¹⁰ ¹¹ .
Primary radar (SPY-7)	United States – Lockheed Martin's Moorestown, NJ facility builds the SPY-7 radar under a US\$104.6 million contract 【181464457829690†L59-L81】 .	US DoD announcement 【181464457829690†L59-L81】 .
Laser warning & countermeasure system	Canada – MDA develops and manufactures the laser warning and countermeasure system at multiple Canadian sites, including Richmond (BC), Brampton & Kanata (ON), Montréal (QC) and Dartmouth (NS) ¹² ¹³ .	MDA news release ¹² ¹³ .
Electronic warfare suite	United States & Australia – Canada will acquire the AN/SLQ-32(V)6 EW system via U.S. FMS; it integrates BAE Systems' Nulka decoy, which is produced in Australia ¹⁴ .	Journal of Electromagnetic Dominance ¹⁴ .
Hull-mounted sonar	United Kingdom & Canada – Ultra's S2150-C sonar is transferred from the UK Type 26 program; technology transfer and jobs are created at Ultra's Canadian facilities ¹⁵ .	Naval Technology article ¹⁵ .
Towed array sonar (CAPTAS 4)	France & Canada – Thales produces the S2087/CAPTAS 4 towed array sonar in France and works with Canadian industry for maintenance and upgrades ¹⁶ ¹⁷ .	Naval Today and Defense Post ¹⁶ ¹⁷ .
Torpedo launchers	Canada – SEA Canada manufactures torpedo launchers at its Ottawa facility ¹⁸ .	SEA Canada press release ¹⁸ .
Visual Surveillance System & IPMS	Canada – L3Harris develops the Visual Surveillance System and Integrated Platform Management System in Montréal; the contract for these systems is worth >CA\$170 million for the first three ships ¹⁹ .	Irving Shipbuilding release ¹⁹ .
Integrated bridge & navigation system (IBNS)	Canada – OSI Maritime Systems designs and manufactures the IBNS at its Burnaby, BC headquarters ²⁰ .	OSI release ²⁰ .

Component/system	Primary sourcing location(s)	Evidence
Combat management system (CMS 330)	Canada – Lockheed Martin Canada integrates the CMS 330 and leads sensor and weapon integration, working with partners at Canadian facilities ²¹ .	National Defence project summary ²¹ .
Main gun	United States – BAE Systems’ Mk 45 Mod 4 127 mm naval gun is manufactured at BAE’s Louisville, Kentucky plant (integration occurs in Canada).	Industry convention.
Surface-to-air & cruise missiles	United States – Raytheon’s SM-2 Block IIIC, ESSM Block II and Tomahawk missiles are procured via U.S. FMS and produced in the U.S.; integration is carried out by Lockheed Martin Canada.	FMS framework.
Anti-ship missile	Norway & United States – Kongsberg’s Naval Strike Missile production is shared between Norway and the U.S.; integration onto Canadian ships is performed by Lockheed Martin Canada.	Program details.
Decoy & countermeasures	Australia – BAE Systems’ Nulka active missile decoys are produced in Australia and integrated with the AN/SLQ-32(V)6 system in Canada ¹⁴ .	Journal of Electromagnetic Dominance ¹⁴ .
